

DNAPLANET

Is there any pain involved in the test?

No. The cells needed for a DNA test can be simply swabbed from the inside of the cheek with a sterile cotton swab.

Not only is it pain-free, everyone can do this themselves at home. The person conducting the test should not eat or drink for approximately one hour before the test

Dr. Michael Jung (Diploma in Physical Chemistry) is your competent contact person at dna-planet -- Tel: +49 641 2099102
